🌐 in/tatjana-devrnja-6a35001b0/

EDUCATION

Master's Degree in Business Informatics

VSSSVI – Sirmium
2019 – 2021

Bachelor's Degree in Business Informatics

VSSSVI – Sirmium
2015 – 2018

LANGUAGE

English (Professional working proficiency)
Serbian (Native)

HIGHLIGHTS

- Strong focus on performance, scalability, and real-world usability
- Experience building interfaces that directly impact conversion and user engagement
- Ability to translate design into clean, maintainable, production-ready code
- Detail-oriented with strong sense for UI/UX quality
- Comfortable working in distributed teams and async environments

About Me

Frontend Engineer with 4+ years of experience building high-performance web applications using React, Next.js, and TypeScript, primarily in e-commerce and headless CMS architectures. Focused on delivering fast, scalable, and conversion-oriented user interfaces that directly impact business performance. Strong understanding of performance optimization, SSR, reusable component systems, and modern frontend architecture. Comfortable working closely with product and backend teams to build production-ready solutions that directly impact user experience and business outcomes.

WORK EXPERIENCE

Oct 2025 – Jan 2026

Montenix

Frontend Developer

Responsibilities:

- Implemented redesigned UI sections for an existing web application using React, Next.js, and Tailwind CSS
- Translated Figma designs into pixel-perfect, responsive components
- Integrated dynamic content using Contentful CMS
- Ensured cross-browser compatibility and mobile-first implementation

Key Contributions:

- Delivered UI improvements aligned with branding and usability goals
- Improved layout consistency and overall user experience
- Focused on performance optimization and responsive rendering across devices
- Enhanced CMS structure for easier content management
- Contributed to improving frontend performance and user interaction responsiveness

2023 – 2025

Forga

Frontend Developer

Responsibilities:

- Developed and maintained production-ready e-commerce and presentation websites using React, Next.js, and TypeScript
- Built scalable frontend architectures within headless CMS environments (WordPress, GraphQL)
- Created reusable component libraries ensuring consistency across multiple projects
- Collaborated closely with backend developers and designers to deliver complete features
- Integrated APIs and handled complex data structures on the frontend

TATJANA DEVRNJA

Frontend Engineer (React / Next.js)

SKILLS

Frontend & UI Libraries:

- React, Next.js, Gatsby, Redux, Chakra UI, Tailwind CSS, Material UI

Programming & APIs:

- JavaScript, TypeScript, REST API, GraphQL

CMS & Platforms:

- WordPress (Headless), Contentful

Tools & Collaboration:

- Git, Bitbucket, Azure, JIRA, Asana, Figma

Architecture & Performance:

- SSR, Static Generation, Performance Optimization, Modular Architecture, Reusable Component Systems

OTHER SKILLS

- Agile methodology
- Cross-functional collaboration
- Web accessibility basics
- Modular architecture design
- Clean code principles

Key Contributions:

- Built and maintained real-world storefronts serving active users across multiple markets
- Improved page load performance through optimized rendering and asset delivery (resulting in better Lighthouse scores and faster load times)
- Implemented SSR and optimized image handling to enhance load times and user experience
- Refactored frontend architecture to improve scalability and maintainability
- Contributed to headless CMS implementations and content flexibility
- Continuously improved existing platforms based on user and business needs

2021 – 2022

Kortechs

React / React Native Developer

Responsibilities:

- Developed features for a ride-booking platform across web and mobile applications
- Built booking flows, trip management features, and operational dashboards
- Integrated APIs supporting booking workflows and real-time updates
- Collaborated within agile teams and participated in cross-functional development

Key Contributions:

- Delivered production-ready features used in real-world applications
- Improved usability of booking and ride management flows
- Contributed to internal dashboards used for daily operations

ADDITIONAL EXPERIENCE

- Implemented client-side tracking of user interactions (clicks, navigation, forms) for better analytics and insights
- Focused on clean event handling and data flow between frontend and backend systems
- Participated in debugging, testing, and ensuring stable production releases
